OPENING PALO DURO PARK IS BEING PLANNED

Canyon - Amarillo Committees Working on Plan

FIVE DAYS SET

Advertising of Park To Be Uniform Between Towns

Planning for the moster celebration at the formal opening of the Palo Duro State Park on July 4, 5, 6, 7 and 8 has been undertaken by the Chambers of Commerce of Canyon and Amarillo. D. E. Colp, chairman of the Texas State Parks Board, requested that these two bodies take charge of the general arrangements for the opening.

J. H. Cox, Jr., C. Wesley Batchelder and Fred E. Wortham met in Amarillo Monday night with Chas. Wolfin, Guy Carlander, Horace Russell and George Autry to discuss plans for the opening. Plans were adopted which were submitted to Mr. Colp for his approval.

It is planned to make the Fourth of July as a great patriotic event. Other special days have been designated. The rodeo under the direction of Leonard Stroud will be held on all five days.

Advertising booklets for the Palo Duro are being planned by the Canyon and Amarillo Chambers, and a campaign put on to distribute several thousand among commercial agencies who will place them among people interested in the Park. The books will contain

TB Test Under Way as County Check-Up

Federal Men Going Over Herds Which Showed TB Disease

A re-test of all herds in Randall county which were found affected with tuberculosis is now underway under the direction of two veterinarians from the U. S. Department of Agriculture. The re-test of the county will take about ten days and will be free to the herd owners.

In the test recently made, a very small percent of the cattle of the county were affected with TB. So free was the county of the disease that a certificate was issued to the county showing it to be in the accredited area of Texas. However, it is the object of the federal government to entirely eradicate TB in all herds of the county. A follow up test will be made in a few months if there are any herds in the county which show TB in the present test.

The only expense in connection with the present test is the labor of two helpers which are frunished by the county. The farmers are notified in advance when to have their cows in the pen ready for the test.

Commencement Play Received Well By a Large Crowd Friday

"Mary the Third," which was given last Friday night was pronounced by many the best commencement play of recent years. This is a very modern play by Rachel Crothers, portraying in excellent comedy the conflicts between three generations of an American family.

The cast was well chosen and the work of the members usually well balanced in quality. Five members of the Panhandle Players did excellent, though brief, work in the prologue showing the courtships of Mary mother and grandmother. Adella Beavers, J. C. Baker, Jr., Pollyanna Pitts, George Brewer and William D. Hawkins had these parts.

Farris Sears, a senior of Amarillo played the part of Mary the Third. Her depiction of the modern, questioning daughter of today, frivolous on the surface but serious beneath, delighted the audience.

Fern Landers of McLean, playing the part of the grandmother was considered by many the best of the cast. Not once did she slip out of character. Ernestine Walker of Memphis did convincing acting as the distraught mother, confronted with a constant conflict between her mother and husband and her children.

Others whose work helped make the play a success were Seth Lindsey, Wendell Cain, Stanley Williams, Arlen Hartzog, Elizabeth Jameson, Robert Black and Rosamond Jarvis.

The play was seen by a large audience. The proceeds will be used to buy needed books for the Training School library.

HAD OPERATION FRIDAY

Albert E. Terry underwent an operation for appendicitis at Temple Friday. He is reported to be improving in a satisfactory manner.

Miss Vera Wilson, a senior from Silverton, has been elected to teach the intermediate grades at Haylake school, Briscoe county.

No work is being done on the bridge over Timber Creek as this will take about two weeks to complete, and will be the only detour on the Goodnight Trail after the opening of the Tierra Blanca bridge.

Supt. G. A. Syms of Adrian was a visitor on the campus Saturday.

MURALS HOLD NEW ATTENTION IN THE MUSEUM

Panhandle Artists Hang Paintings in the Museum

HISTORY SHOWN

New Attraction Praised By Thousands of Visitors

Visitors to the Panhandle-Plains Historical Society Museum will find a new source of delight in two murals which have been placed on the walls during the past week. These are the work of Panhandle artists, Ben Carlton Mead of Amarillo and Harold Bugbee of Clarendon, and were planned and executed under the critical direction of Dr. John Ankeney of Dallas.

Mead's painting represents Coronada's party at the critical moment when they have decided that the Indian called The Turk is deliberately misleading them and intends to desert them to die of starvation and thirst. The brilliant colors of the canyon as seen in mid-day, the richly caparisoned mount of Coronado, the vivid green of the cedars and the piles of cloud make the picture one of immediate and compelling interest. The scene suggests the Indian's point of view of the occasion and that The Turk, so called by the Spaniard because of the slightly oriental cast of his features, felt a premonition that the white man's coming boded ill for his people.

On the east wall, immediately opposite hangs Bugbee's conception of the entrance of Colonel Charles Goodnight and his herd of 1600 cattle into the Palo Duro canyon on that day in 1878, so significant to Panhandle history. The first surprise of the picture is the brand which is seen on the cattle. The JA, so long associated with Goodnight and Adair is expected, but instead is seen PAT. Dave

Cows Must Not Run on Highways

Owners of cows are warned not to let them graze on the highway. A number of cows may be seen almost daily along the highways, and orders have been issued by the State Highway department that they must be removed.

There is danger of accidents, both for the cows and for cars.

Many of the new trees which were set out to beautify the highways are being damaged by the cows. These trees will be sprayed by a deadly poison during the coming two weeks, and the cows are liable to be killed.

Clover is being planted along the highways in the beautification program, and must not be grazed this year.

Owners of cows allowed to run on the highway are subject to prosecution, but this warning is given in order that no one be forced to pay a fine in court.

Nine Crews Making Surveys for Wheat

Joe W. Bailey to Speak Monday a. m.

JOSEPH W. BAILEY

Candidate for United States Senator will speak at court house Monday morning at 10:00 o'clock.

Farmers Urged to Save Time By Meeting Surveyors

Nine crews are making surveys in Randall county, measuring the wheat land which is under contract.

Accurate measurements are required of the land, and plats must be forwarded to Washington before the balance of 1933 wheat allotment will be paid, and before the first payment of the 1934 allotment will be considered.

The surveying crews find that the biggest difficulty confronting them is the fact that it is so hard to find the farmers when they are ready to survey the land. The owner must be present, or have a responsible representative present when the survey is made. To go back over the territory to measure lands when the farmer cannot be located, or to delay the surveying crew in their work simply runs up the expense which comes out of the pockets of the farmers themselves.

Wheat farmers are urged to ascertain what day they may reasonably expect the crew to do the work on their places, and then to be at home and ready to assist with the work. This will speed up the allotment payments very greatly and will reduce the expense of the survey in the county.

Joe Bailey Will Speak Here Monday Morning at 10:00

Joseph W. Bailey, congressman-at-large from Texas, will speak at the court house next Monday morning at 10:00 o'clock in the interest of his candidacy for the United States Senate.

Mr. Bailey was elected to the office of congressman-at-large two years ago. Re-districting of the state leaves him without a seat in the House of Representatives. He is running for the place in the Senate held by Tom Connally, and formerly held by his father, Joseph Weldon Bailey.

Changes Will Be Made in CCC Co. Heads at Park

Lieut. E. L. Hager has been promoted to the rank of Captain. He is serving in Company 1828 at the Palo Duro State Park. Lieut. Otey of Co. 1821 left yesterday on a transfer to a CCC company at Rush Spring, Okla.

Captain Gibson has received notice of transfer on June 30th, but nothing definite is stated in the orders.

Children Adding Number of Books to Public Library

The children of Canyon are helping the children's section of the public library to grow by giving books of their own and by making books, according to Miss Fannie Malone, the librarian.

Mrs. W. E. Miller's Sunday school class, composed of Clarence Eugene Thompson, Annie Lee Newlin, Talmage Boslen, James Thomas Harp and Kenneth Bosley have made scrap books.

Marcia Batchelder recently presented six books suitable for children younger than she now is.

Grant Sherman has given a copy of Gulliver's Travels.

The Junior Woman's Club has recently added the following specially selected children's books. Pell's New Suit, The Real Mother Goose, Millions of Cats, Peter and Polly in Winter, The Dutch Twins, The Children's Classics and Goops and How to Be Them.

Since school closed the children and young people are especially invited to spend some of their afternoon's reading in the library. Besides books there are magazines, newspapers and funny papers to be seen there.

Five Less Scholastics Enumerated in Canyon District

Andy Walsh has completed the scholastic enumeration of the Canyon Independent School district, which shows a reduction of only five under the total of last year.

The totals for Randall county have not been compiled as the trustees in the common school districts are just completing this work, and the compilation has not been accomplished in the office of Judge S. B. Orton.

Hong Kong Rotarian Talked Last Night to The Canyon Club

Fred Key of Hong Kong, China, talked last night at the special meeting of the Canyon Rotary Club on conditions in the Orient. He is an Englishman, is Secretary of Commerce representing Great Britain, and secretary of the Rotary Club. He was on his way to Rotary International convention to be held in Detroit. His comments upon China and upon America were of great interest to members of the local club.

"I visited the Grand Canyon, and find that the Palo Duro has the same coloring, but much superior to the Grand Canyon owing to the road," was his comment upon local scenery.

Visitors at the luncheon were Bishop and Mrs. E. C. Seaman of Amarillo, Rev. Warwick Aiken of Plainview, S. H. Condron, C. R. Burrow, Dr. C. A. Pierle of Canyon.

Randall County Given Place Drouth Relief

Set Up For Road Work Is Promised During This Week

Randall county was included in the modified order on the drouth stricken territory of Northwest Texas Monday after protest had been filed by Congressman Marvin Jones. Under the original order, only five counties were included in the drouth territory.

In the written agreement with Harry Hopkins at Kansas City Thursday, representatives of the West Texas Chamber of Commerce were promised that adequate aid would be given this territory.

Great surprise was expressed when announcement was made Saturday that relief would be given only to five counties of this section. Protest was filed that Hopkins, who again was breaking faith with the Panhandle, and the demand was made that all of the counties which had been suffering from the drouth be given a relief program in the same proportion as promised to the drouth section of the middle west. Wilbur C. Hawk and Julius Dorenfield, both of Amarillo, who attended the conference at Kansas City expressed great surprise that Hopkins should change the agreement as made last week.

It was indicated after the protest made by Marvin Jones, and the order was revised as to the number of counties to be included

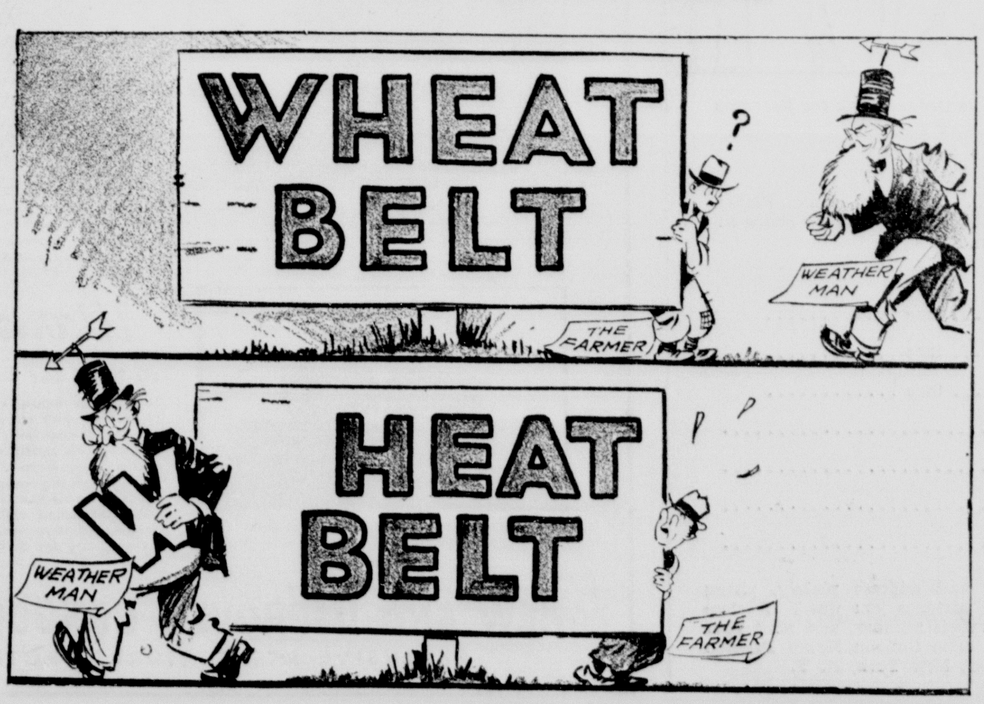
AN UNWELCOME WEATHER "CHANGE"



Joe Hill Sends Byrd Pictures From Pole

Unloading Operations at Little America Are Shown

Dr. and Mrs. J. A. Hill have received a number of pictures which were taken by their son, Joe Hill, Jr., who is with the Byrd Expedition to the South Pole. The pictures are a most interesting study of the unloading operations which took place when the ships were transferring supplies to Little America.

The films were brought back to America by Dr. G. O. Shirey who returned on the supply ships after the unloading. They were developed by Dr. Shirey and forwarded to Dr. and Mrs. Hill.

On the back of each picture, Dr. Shirey wrote interesting details of the subject matter of the picture. These are the first pictures which have been shown here of the Byrd expedition since it reached Little America.

Messages are received weekly by his parents from Joe who seems to be greatly enjoying his new experiences in the polar region. The messages come from unusual and unexpected sources, usually being picked up by some station and forwarded to the Hills. An unusual comment on conditions being experienced is the fact that the temperature moderates while a blizzard is in progress. The last message received was that a blizzard had been raging for two days.

Not many criminals can boast that they have cost a state $1,000,000. But if Clyde Barrow is so situated today that he can boast about any of the cussedness he has performed, he can say that he cost the state of Texas more than any other criminal. The fact that Barrow and his gang are disposed of for the present, does not mean that the state may rest on its oars. Chief Justice Hughes, following the example set by Chief Justice Taft, deplores the delays in court procedure. The law fraternity can remedy this, if it will. The law fraternity controls all law making bodies in this country. The lawyers should see to it that capable men are elected to the legislatures and to congress and that adequate laws are made which will treat the criminal as efficiently and speedily as the criminal treats society. It is a sad state of affairs when many intelligent people actually complained at the rudeness of the law when the arch criminal Barrow was shot down without giving him a chance to kill an officer or two. This civilization of ours has a long way to go in effectively handling crime. Texas stands fourth among the states of the union in crime, being excelled only by South Carolina, Oregon and New Mexico. Only six states have more murders per 100,000 population than does Texas. Dallas is fourth among the large cities of the nation in the ratio of murder. It is time that Texas was waking up to its crime situation.

Listen to Jim Ferguson speaking at Amarillo on June 26, 1930: "Strange as it may seem to you, I am glad to see you have a candidate for Governor in view of the fact that you have a good young man running for Governor. It shows that you people want to be considered and want the world to know that you are interested in having good government down at Austin. Frankly, now, when your candidate becomes a little more experienced, a little older, as far as I am concerned, I will throw nothing in his way to become Governor of Texas." That was four years ago when Clint Small made his first race for Governor, and came within a few thousand votes of getting into the second primary with Mrs. Ferguson. Since that time Clint Small has become the real leader of the state senate. He is attracting the attention of all conservative voters in Texas. This is likely the last chance the Panhandle will have to elect one of its native sons to the Governor's office, and therefore the people of this section will cast their votes for Clint Small.

Every time it sprinkles in the Panhandle, Harry Hopkins says that the drouth is over, and there is no need to help in this section. Harry cannot comprehend the fact that the Panhandle is going thru its third year of drouth. But excuse us Harry, you said to the West Texas bunch up at Kancas City last week that to criticise you was a slap at the President. Of all the idiotic statements that have spouted from the lips of any of the governmental hirelings, Harry utters the supreme one. Harry has not yet answered the question asked hundreds of times: "Why did you not turn over to this section the relief money when it was granted last September in the executive order of the President of the United States?" After this is definitely answered, it would be well to discuss other problems in this relief delay.

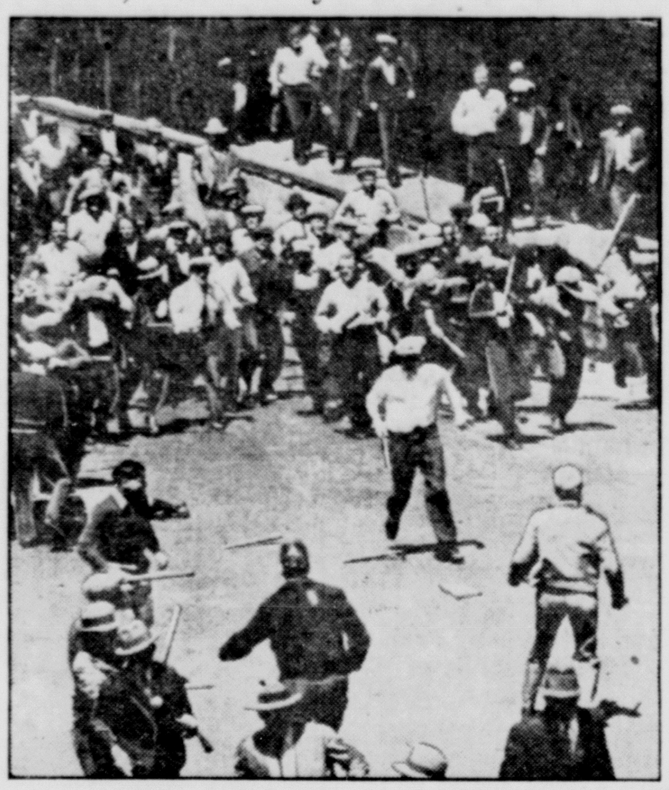
"As a man thinketh in his heart, so is he," states the scripture. A visitor in Canyon last week made the statement that he was not afraid of material conditions of today, but he was afraid of the thoughts of men. Economic conditions have a lot to do with the good or evil thoughts of our citizenship, and it was with this in mind that the President has bent his efforts toward relieving the economic strain upon the people. What men are capable of thinking, they are usually capable of performing. With all of the idle time of the present, and continued economic stress, men are not thinking the thoughts which will make them better.

A definite swing in favor of Senator Clint Small is reported over East Texas. "I shall be surprised if Clint Small does not receive a majority over all candidates in many of the East Texas oil counties," stated one citizen of East Texas who was here on business. "With the normal vote of the Panhandle, Clint Small will lead in the first primary," stated the visitor. The Panhandle responds that Clint Small is their friend, has always been their friend, and that they will again give him their vote. East Texas and West Texas will join hands this year in electing a West Texas man to the Governor's office.

Many people wonder why it is that so slow progress is being made in the appointment of Democratic postmasters to succeed the Republicans whose terms have expired. The fault is with the civil service. No one can appreciate the great increase in government employment since the inauguration of the many relief agencies which have been started by the government. All appointments to these jobs must be made through the civil service department, and must be made as soon as the new work is started. As a result the postoffice jobs are the last that will be filled.

Edgar Witt and other candidates for Governor say that the Texas prohibition amendment fails to prohibit so it should be repealed. In view of the fact that Texas is near the top of the crime lists of the United States, we presume that the same logic would have the legislature repeal all criminal laws because they are not stopping crime.

Fists, Clubs Fly in Strike Clash



Riots so serious and violent that Gov. Floyd B. Olson threatened to call out the national guard marked the Minneapolis truck drivers' strike. • • A DOLLAR AND A HALF WORTH OF OIL PROTECTED THIS MOTOR FOR OVER FOUR THOUSAND MILES!

Here is the winner!—the car that covered 4,729 miles at fifty miles an hour, lubricated with New and Improved Conoco Germ Processed Motor Oil.

AAA SANCTION NO. 3001

Low Consumption and Motor Protection proved in the most daring and convincing Motor Oil Test ever made . . .

WHEN New and Improved Conoco Germ Processed Motor Oil was perfected, it had lubrication values so great that a mere statement of them would seem absurd. Could you believe that any strictly stock motor could run 4,729 miles on just five quarts of oil before wrecking itself? It did—and Conoco proved it in competition with five widely known, nationally advertised, quality brands of motor oil!

The competition was held at the Indianapolis Motor Speedway, under the supervision of the Contest Board, American Automobile Association. Six new, strictly stock cars, were used—a different oil of the same S. A. E. grade in each.

After the cars were broken in for 2,500 miles, they were drained, examined and a fresh fill of five quarts put in each crankcase. No more oil was added. Then the crankcases were sealed by an AAA official. The real test began. It was ordered that they be driven at an average of 500 miles a day at 50 miles an hour until their motors failed to operate. Oil No. 4 was first to fail at 1,713.2 miles. Oil No. 6 failed at 1,764.4 miles. Oil No. 5 ruined its motor at 1,815.9 miles; three of them were out of the running. The next day Oil No. 1 failed to lubricate and, its motor wrecked, stopped at 2,266.8 miles.

Two cars—two oils—still left in the test. Oil No. 3, after a remarkable run of 3,318.8 miles, came to a shuddering stop, and the last competitor of New and Improved Conoco Germ Processed Oil, was out. The lone car, with this tremendously vital oil, labeled No. 2, went on and on. On the tenth day, at an almost unbelievable total of 4,729 miles, it failed—an all-time record mileage on a total of five quarts!

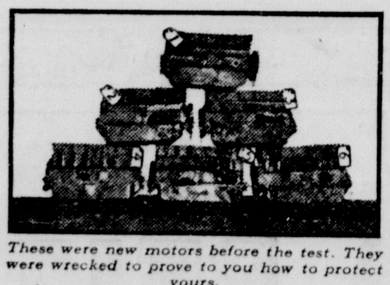
The "Hidden Quart" of new oily penetrativeness won—the greater film strength and higher resistance to the effects of dilution—the absence of carbon and sludge—all aided in this great achievement. It firmly supported Conoco's patented principle of added oiliness—it proved every claim. Conoco alone can make oil this way. It is covered by recent United States patents.

You can have this oil in your car, for it costs no more than other quality oils. Drive into a Conoco Station or dealer, marked by the Red Triangle. Fill and know the satisfaction, the freedom from repairs, the economy of low consumption that only Conoco gives.

Five quarts of each brand of oil were carefully put in the cars by AAA officials.

Here are the Representatives of the Contest Board of the American Automobile Association who supervised every detail of the test and attested to the records made.

The official sealing of crankcases after fill of five quarts was put in. No addition of oil was permitted in this "destruction" test.



These were new motors before the test. They were wrecked to prove to you how to protect yours.

Warning

to new car owners . . .

Some car manufacturers are using new types of bearings which will stand greater pressures and temperatures, resulting from increased power and speed. New and Improved Conoco Germ Processed Motor Oil has been exhaustively tested on these new bearings. The results show that it gives them greater protection against damage than many straight mineral oils now on the market. Protect your new car by using the motor oil you can be sure of.

Shoot the Works Say the Leaders

During the past few years many firms have cultivated a dangerous attitude of waiting.

"Let's hold up our advertising appropriation till business gets better," said the waiting executive of 1931.

"Let's see what effect the moratorium on war debts will have," said the waiting executive of 1932.

"Let's see what this New Deal will do," said the waiting executive of 1933.

"Let's see what effect our code will have," says the same man in 1934.

Wait—stall for time. It's getting to be a habit. But thumb twiddling never sold an order.

"I'll shoot the works," said Walter B. Chrysler in effect when he brought out his airflow cars.

"We'll shoot the works" was the action of Union Pacific's stream-lined railroad train.

"Shoot the works" is the American symbol of fast, sale-getting progress.

Mister, it's time for action. Do a little works-shooting in your business. Turn loose with a sales campaign or that big idea you've been nursing along for a couple of years. Sell your Board of Directors on the idea of spending money on sales and advertising. It takes money to make money.

An earnest effort to "Shoot the Works" on the part of business would do more good than all the trade legislation that has been or ever will be concocted. —Impressions.

Receives As Many As 10,000 Letters Weekly

Harry Richman

HARRY RICHMAN, star of stage, screen and radio, who broadcasts every Wednesday night over a nation-wide hook-up of 26 stations extending from New York in the East to Salt Lake City in the West and Houston in the Southwest, is best known for his amazing faculty for putting over a song and yet he has never taken a singing lesson in his life.

When asked what was his idea of the most useless pastime, he replied:

"Playing contract bridge. It's a game for people who want to remain indoors and get fat."

Tennis, thinks Richman, is a good game for thin people with good hearts.

His idea of nothing to do is to lie in bed after you have had 12 hours sleep.

Every day's mail brings Richman hundreds of letters from admirers and a curious assortment of gifts. He has received boxes of nuts, packages of raisins, collections of clippings about himself, garters, handkerchiefs, bark off trees, nails for luck, embroidered towels, baby turtles. He has received as high as 10,000 fan letters in a single week.

When asked what annoys him most he said:

"To loan money and not get it back."

Richman's great voice has won for him a tremendous national audience.

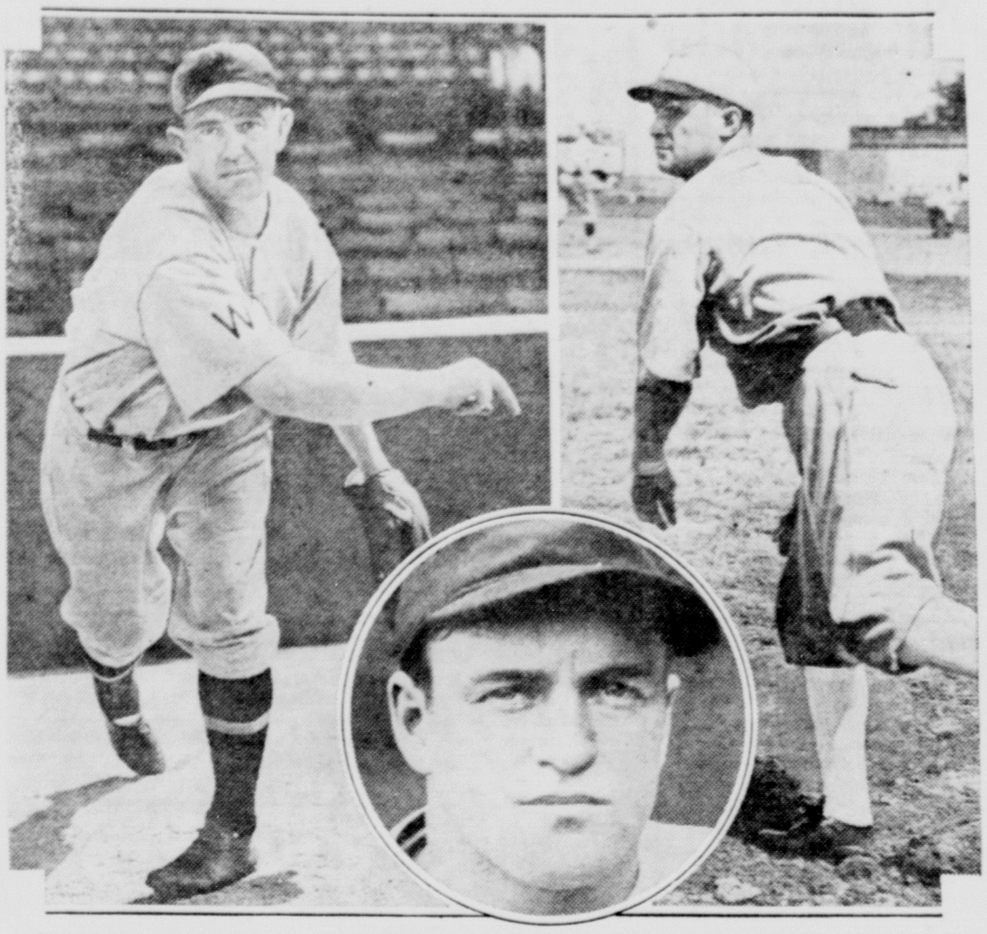
Perhaps the Management of the Washington Senators Has Been Counting Too Much on Pitchers Earl and Alvin



Joe Cronin, center, manager of the Washington Senators, looks perturbed about something. And no wonder! If General Alvin Crowder, left, and Earl Whitehill, right, Capital hurlers, keep on the way they've started the season, the Senators may end in the second division.

BY PHILIP MARTIN

COLLAPSE of two members of Washington's pitching staff may spell second division for the Senators this year.

On the two hurlers, General Alvin Crowder and Earl Whitehill, who won more than 40 games between them in 1933, depended success of Joe Cronin's crowd as the 1934 season started. During the first month of competition, however, neither lasted a game in which he started.

That is going to make it tough for Cronin, and reflect to a great extent on the judgment of Owner Clark Griffith.

Before the start of the present season, Griffith elected to stand pat on his pennant-winning 1933 outfit, with the exception of a trade with Detroit in which he got Johnny Stone for Goose Goslin.

He figured his pitching staff that took the Senators into a world series last year was plenty good enough to strut along without injection of new blood, and that his infield, strengthened by the addition of young Cecil Travis, again was of championship caliber.

But as it now turns out, Griffith was wrong about one item—his pitching staff. Addition of a couple of youngsters who could go the route until Crowder and Whitehill could round into form again would give the Senators the chance to keep on top all year. As it is, Cronin, the great juggler, won't be able to make half enough switches in his lineup to win games without young hurlers.

• • •

SPEAKING of youngsters, there are several who are making their marks in big time this year.

One of the outstanding kids is young George "Tut" Stainback, the outfielder the Cubs secured from Los Angeles for $75,000 last year. Stainback has displayed a great throwing arm, and base running ability ranking with that of any veteran in the game.

In addition, he is hitting hard enough to put him right up there with Klein, Cuyler, Stephenson, and Herman. He seems to be worth every one of those rocks the Cubs parted with.

A couple of other youngsters are going great—Don Heffner, Yankee second baseman, and Harry Lavagetto, keystone sacker of the Pirates. The former, coming up from Baltimore, has developed into a sweet hitter, in addition to being the classiest fielding rookie to hit the American League in moons.

The latter, through the shifting of Tommy Thevenow to third to take the place of ailing Pie Traynor, is playing a bang-up game at the keystone sack, and should fulfill the promise he displayed in the Pacific Coast loop last year.

Uncle Sam Wages Grim War to Stamp Out Remnants of Underworld Gangs

WHEN Clyde Barrow drove into a trap and met his death near Sailes, La., recently, police forces of the nation wiped one more name off their list of "most wanted" criminals. There remain now two "big shots" and a handful of lesser gunmen to be stamped out before forces of law and order can again dominate the underworld.

The two big names are those of John Dillinger and Charles "Pretty Boy" Floyd.

The public needs no introduction to Dillinger; newspaper front pages for weeks have featured his evil, sneering face and daring deeds.

It was just a year ago that this desperado launched into big-time banditry. Previous to that, clumsy "stick-ups" and a prison term punctuated a criminal record similar to that of most small fry of the underworld.

Born in Mooresville, Ind., 32 years ago, reared by respectable Quaker parents, Dillinger early elected to shoot instead of plod his way to fame. Blamed, rightly or wrongly, for a series of robberies, murders and jailbreaks, he is wanted particularly for the murder of Patrolman William P. O'Malley during an East Chicago bank holdup.

Clyde Barrow and "Pretty Boy" Floyd have been described romantically as the "Terrors of the Southwest." Barrow, 24, was little more than a drugstore cowboy and a petty auto thief before he took to the gun route. The 12 notches on his gun, slayings he is said to have committed in the last two years, lent Barrow a certain glamour; but his prestige availed him little when he drove into the police ambush in Louisiana.

Charles Floyd is, however, of a different breed. Raised around Sallisaw, Okla., "Pretty Boy" started on the easy money route by taking part in a St. Louis payroll stick-up. He served four years for his crime; then, in 1929, blossomed out as a full-fledged desperado.

While en route to jail for a couple more "jobs," he escaped by leaping from a train going at full speed.

A dead shot with automatic or machine gun, "Pretty Boy" is rumored to have committed a dozen murders.

• • •

RATED by many as being tougher than Dillinger are Alvin Karpis and Doc Barker, believed involved in the Bremer kidnaping case, and also suspected of having operated with the Barrow and Dillinger gangs.

Fingerprints of these men were found in the farmhouse in which the 37-year-old St. Paul bank president, Edward G. Bremer, was held while the abductors were collecting $200,000 in ransom. Since he was paroled in 1932 from Oklahoma state penitentiary, after serving 10 years of a life sentence for murder, Barker has apparently been active in a long series of crimes.

Karpis, or Karpavics, is also a professional criminal who has served time for burglary, larceny and safe-blowing.

Three other criminals are being sought in connection with the Luer kidnaping case: Walter O'Malley, Lloyd Doyle and Mrs. G. M. Chase. Six of the gang who kidnaped the feeble, 77-year-old Alton, Ill., banker, August Luer, are in jail; but O'Malley, Doyle and the woman have managed to evade the law.

When the police net finally closes about Dillinger, law officers hope to find enmeshed also several accomplices almost as deadly as their chief. They are Tom Carroll, paroled thief, bank robber, and gunman, wanted especially for the murder of a federal agent; George Nelson, involved in the same crime; Homer Van Meter, paroled Indiana convict, wanted for a St. Paul bank robbery; and John Hamilton, auto thief, wanted in connection with the murder of Sheriff Jesse Sarber of Lima, O.

Prison, capital punishment, or death by hot lead looms for two desperadoes, John Dillinger, center, and Charles "Pretty Boy" Floyd, right. The criminal career of Clyde Barrow, left, ended when he drove into a police ambush recently in Louisiana.

In Some Ways This Bank is Like a Country Store

The old-time country storekeeper was a good judge of human nature. He had to be. He got many requests for goods on credit and he needed to know—and usually did know—when to say "yes" and when not to.

Modern banking, despite advanced bookkeeping and adding machines, is a human business, too. To protect his depositors, a good banker relies on not one but several sets of dependable factors when considering a loan.

But, if he is wise, he looks beyond what mere statistics tell him. He learns to size up his man. He makes it a point to know as much as he can about his applicant's ability, energy, integrity and sense of responsibility. For figures may occasionally mask the truth. You can't juggle human nature.

Here at the First National Bank we never depend entirely upon machine-made statistics where our depositors' money is concerned. We always make our decisions in the light of what we know of a man's character.

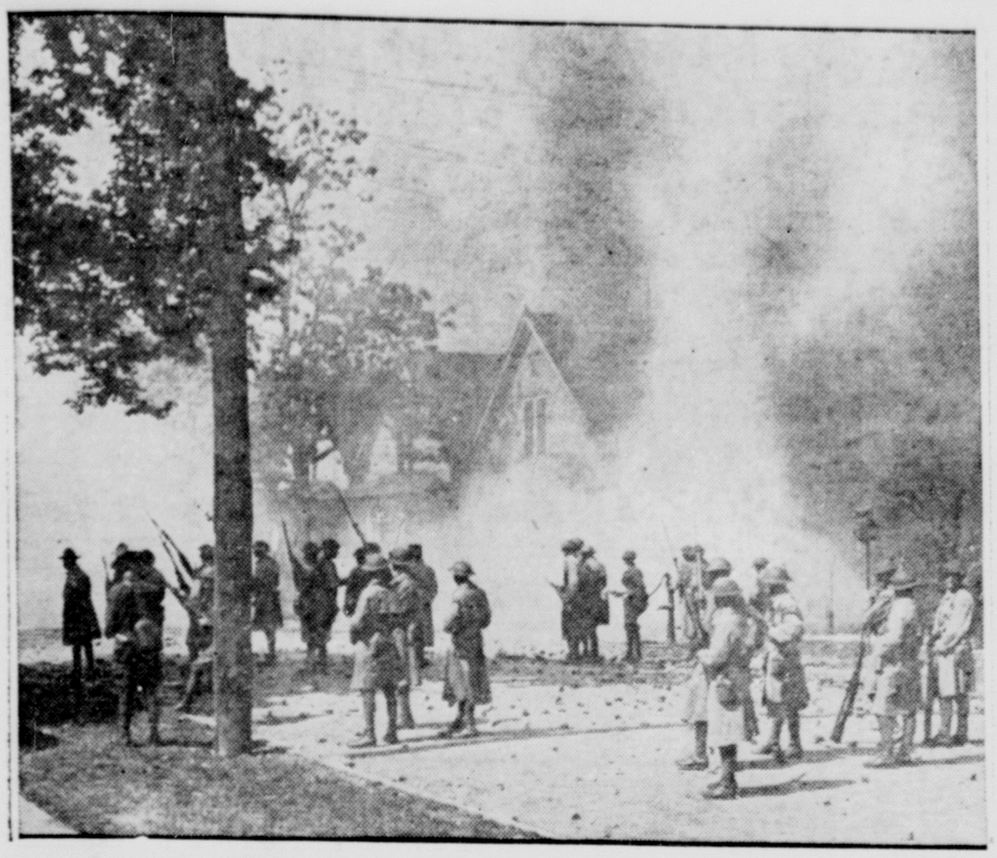
TROOPS USE TEARGAS TO QUELL TOLEDO RIOTERS



Several men were killed and many, including youthful Ohio National Guardsmen, were injured in violent strike riots at Toledo, Ohio. The disturbance started when a mob of approximately 5,000 strikers and strike sympathizers stormed the plant of the Electric Auto-Lite Co., while 800 beseiged workers within dodged missles thrown through the windows. The efforts of local police officers failing to check the violence, Ohio National Guardsmen were called to Toledo. In several bloody frays which followed during which troopers used tear gas, and the rioters any missle that came to their hand, the militiamen failed to quell the rioters permanently. In the picture above guardsmen, with bayonets ready, await an attack by the strikers and strike sympathizers. The houses in the background are nearly obscured by clouds of tear gas from bombs thrown by the soldiers.

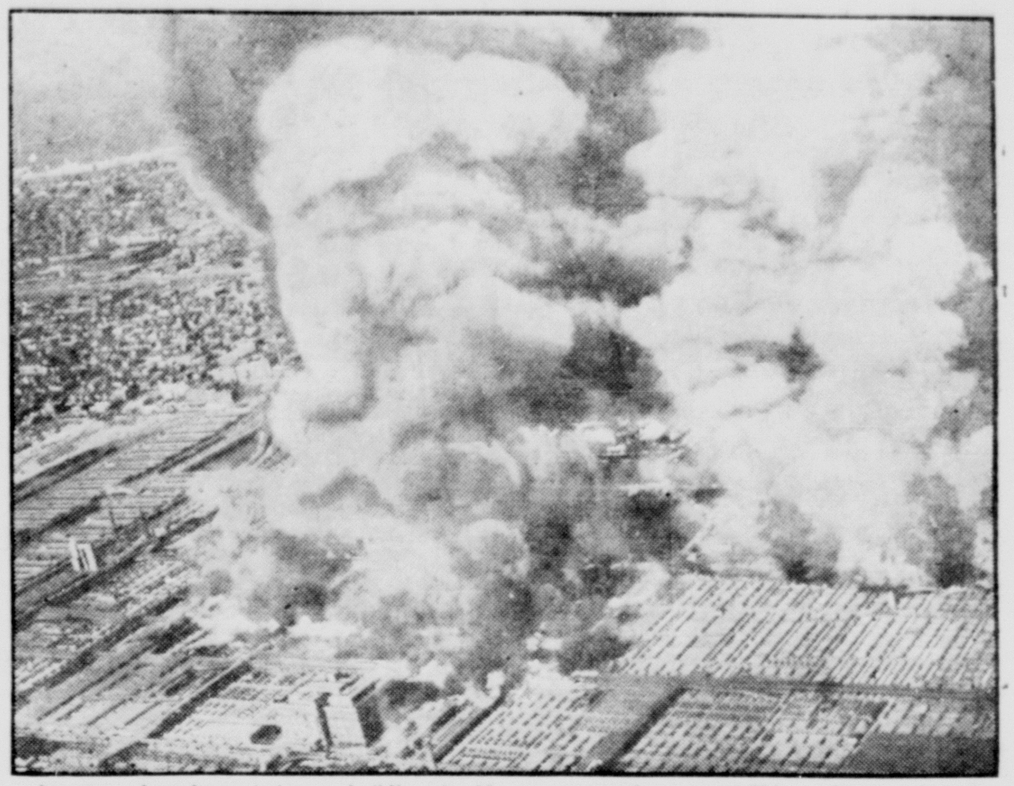
Chicago Rebuilds After $10,000,000 Fire



An army of workmen is busy rebuilding the 80-acre stockyard section of Chicago devastated by the city's worst conflagration since the great Chicago fire of 1871. The air view above was taken during the height of the disaster. The fire wrought $10,000,000 worth of damage in its four-and-a-half-hour career.

"Ann Is Going to Get MARRIED!"

"YES! She's engaged to a nice boy. He's not making a big salary yet, but he's a hard worker. They'll have to be careful of their money at first!"

Careful of their money! With a home to find, furniture to buy, marketing to learn . . . with the thousand and one little emergencies to meet that newlyweds never dream of! . . .

And a young girl, inexperienced in these practical problems, is expected to be careful of her money!

Ann will bless advertising. In the pages of this newspaper she will find the very experience she lacks—the advice she needs!

It is when every penny counts that advertising gives its best service. The advertisements you read are valuable lessons in everyday economy. They help, as nothing else can, to make your dollar go the longest distance. For advertisements show you which article, at the price you are willing to pay, is going to suit you best. And the very fact that it is advertised is its guarantee that it will give you satisfaction after you have bought it.

The advertisements in this newspaper are a most valuable guide to wise buying. It pays to read them regularly.

Murals Hold

(Continued from first page)

McCormick of San Antonio, the only man now living who entered the canyon with Goodnight, and others who were intimates of the pioneer soon after his coming to this part of Texas, vouch for the correctness of the brand. It is not known whose brand this was except that it was a Colorado owner.

The close observer will see that there are sixteen cattle shown in the picture, or one for each 100 head in the herd.

In the lead, at the viewers left is Old Maude, a cow about which many tales are told. Henry Taylor of Clarendon says she was the mother of 27 calves.

Three men, Colonel Goodnight in the prime of manhood, Jud Campbell and Dave McCormick are seen in the picture.

The colors in Bugbee's picture are cool, the purple mist of the distant canyon wall suggesting evening and all the lines of the picture leading down giving a sense of destination reached. Even the grapevine which twines around the white trunk of the dead cottonwood turns downward, leading the eyes and thought into rather than out of the canyon.

There are no clouds in the sky as seen in this mural. Although the two pictures were planned and executed without consultation between the two young artists, they fit together admirably; the clouds and live cedar of the Mead picture, as well as its feeling of conflict and movement from a beautiful contrast with the peace and promise of Bugbee's work.

These two murals are a part of a series of six which when completed will give a pictorial representation of significant and dramatic events of each era of Panhandle history.

cedure of having the class of two years previous in charge, the class of 1932 will furnish the program and be hosts for the alumni luncheon which will be held at Cousins Hall at 12:15 today. Herman Troutman, principal of the high school at Dimmitt will preside, and the report of the outgoing president of the Ex-students Association, T. H. McDonald of Pampa will be a feature of the meet.

Plans for the summer's work of the Ex-student body, welcoming the graduates of the morning and good fellowship numbers will be a part of the program.

No Vacation

When the last student leaves the campus today the college staff will be busy making the last preparations for the opening of the summer session on June 4.

New rulings by the State Department of Education of the State Board have made it necessary for many hundreds of Texas teachers to attend college this year. Dr. Hill and his faculty are anticipating the largest attendance in many years, possibly the largest in the history of the College.

in the drouth relief program, that a set-up would be made during this week in order that road work could start in the Panhandle.

Randall county is greatly interested in the completion of the Goodnight Trail under this relief program, but so far has received no satisfaction. Resident Engineer E. H. Gohmert has made several estimates on the Trail, and these have been turned over to the Highway department. So far, this department has been unable to find funds with which to complete this work. Mr. Gohmert will leave the department tomorrow to go to Rockport to manage his father's hardware business. So far no appointment has been made of his successor.

pictures and descriptive material on the Palo Duro State Park. Two pages will be devoted to the Panhandle Plains Historical Museum. A map will show the highways from Canyon and Amarillo to the Park. One firm has shown an interest in buying 10,000 of the books for distribution.

Word comes from Chicago that the Rock Island Railroad is showing contiuously at the Century of Progress motion pictures and slides on the Palo Duro State Park. Fred A. Emory indicates that pictures will be shown at two other places on the fair grounds within a few days.

A definite plan for the opening celebration will be announced in a few days as soon as Mr. Colp passes upon the plans as submitted by the two chambers.

Students Offered Travel and Study Course in Summer

The College will offer work under an entirely new set of conditions this summer, by giving for the first time a limited number of students the opportunity to earn college credit while at the same time traveling over several of the midwestern states.

Public school systems have recognized that travel is a valuable experience for any teacher and recently colleges have given courses to groups while seeing the territory under study.

The plan for the local college has been worked out in such a way that students may spend the last half of the summer session on a trip which will include Colorado, Wyoming, Yellowstone Park, Utah, with a return through the Mesa Verde region of Southwestern Colorado and the Indian section of northwestern New Mexico. Enroute courses will be taught in English, education and agriculture.

The economy of the combined trip and study will appeal to many, it is believed. The cost, exclusive of the noon meal, will be approximately $100 for each person. Tents and good beds will be a part of the equipment and a cafeteria truck will serve the morning and evening meals. The student-travelers will make their way across country in a large bus, especially designed for the purpose.

Professor Frank R. Phillips will be in charge of the trip, and according to his announcement, classes will be held each morning from 7:30 to 10:30. The remainder of each day will be spent in sight seeing..

Since only a limited number of students can be accommodated in the travel classes, Mr. Phillips suggests that those interested communicate with him immediately. The session will be over in time for every student to be on the campus for the closing of the summer school.

Mr. and Mrs. Paul Setzler of Shamrock visited Tuesday at the home of her aunt, Mrs. C. A. Higdon.
